

EDUCATION

Sharif University of Technology	Tehran, Iran
B.Sc. in Computer Engineering, GPA: 18.62/20	September 2020–June 2025
B.Sc. in Physics (double major), GPA: 19.06/20	(expected)
Young Scholars Club	Tehran, Iran
Preparation Course for the International Physics Olympiad	2019–2020
Allame Helli High school	Tehran, Iran
Diploma in Mathematics and Physics, GPA: 19.66/20	2017–2020

EXPERIENCE

Laboratory of Photonics and Quantum Measurements (LPQM)	Lausanne, Switzerland
Research intern under supervision of Prof. Tobias J. Kippenberg at École polytechnique fédérale de Lausanne (EPFL).	Summer 2023
<i>Worked on developing an automatic qubit calibration system as well as other projects. (See projects section)</i>	
Mobile Communication Company of Iran (MCI)	Tehran, Iran
MCI's Hamrah Academy Internship Program for Olympiad-winning and top undergraduate students. [Certificate]	November 2022–June 2023

TEACHING EXPERIENCE

• Linear Algebra (TA)	Spring 2023
<i>Dr. Samira Hossein Ghorban, Sharif University of Technology</i>	
• Engineering Probability and Statistics (TA)	Fall 2022
<i>Prof. Ali Sharifi-Zarchi, Sharif University of Technology</i>	
• Intro Programming (TA)	Fall 2022
<i>Prof. MohammadAmin Fazli, Sharif University of Technology</i>	
• Physics Olympiad (Teacher)	2019–2022
<i>Allame Helli High school</i>	

HONORS AND AWARDS

• Selected as one of 41 students worldwide (< 3% acceptance rate) to participate in the E3 (EPFL Excellence in Engineering) internship program [Certificate]	2023
• Silver medalist at 4 th European Physics Olympiad, Romania [Certificate]	2020
• Sir Isaac Newton Award (Among the top 200 participants) [Certificate]	2020
<i>Sir Isaac Newton Exam (SIN) is a test of high school physics and is offered by the Department of Physics & Astronomy at the University of Waterloo.</i>	
• Gold medalist at 31 st Iranian Physics Olympiad [Certificate]	2019

NOTABLE COURSES AND WORKSHOPS

- Machine Learning
Sharif University of Technology Fall 2023
- Network Science
Sharif University of Technology Fall 2023
- Quantum Mechanics II
Sharif University of Technology Fall 2023
- Integrated Photonics for Next Generation Technologies (INGEN2023)
Saanen, Switzerland July 2023
- Introduction to Quantum Technologies [Certificate]
Psiket School of Science and Technology, Tehran, Iran March 2023
- Qubit by Qubit [Certificate]
IBM Quantum September 2022–April 2023
- Artificial Intelligence
Sharif University of Technology Spring 2023
- Complex Systems
Sharif University of Technology Spring 2023
- Data Transmission
Sharif University of Technology Fall 2022
- Key Concepts in Blockchain Technology [Certificate]
IEEE Iran section Fall 2022
- Signals and Systems
Sharif University of Technology Fall 2021
- Advanced Programming
Sharif University of Technology Spring 2021
- Hands on Particle Physics [Certificate]
The International Particle Physics Outreach Group (IPPOG) March 2018

PROJECTS

- LPQM Automatic Qubit Calibrator Summer 2023
We developed an automatic calibrator system utilizing Quantum Machines[®] controllers (OPX+ and Octave). Eight calibration nodes employ diverse spectroscopy techniques to make measurements and analyze reflection data (S_{11}) from superconducting qubits. We have implemented a database and API for seamless communication among these nodes. By automating the calibration process, formerly done manually with Vector Network Analyzers (VNAs), we not only streamline measurements but also provide researchers with valuable insights into temporal shifts through continuous monitoring of resonator frequencies, Qubit frequencies, T_1 , and more.
- LPQM Switch Controller [Repository] [Demo] (Not connected to the real fridge!) Summer 2023
Developed a Python API and GUI for a network switch connected to Radiall[™] switches in the Bluefors fridge at LPQM lab, optimizing switching processes to minimize pulse length and reduce heat input during setup changes.
- LPQM Autonomous Wafer Testing System Summer 2023
The project configured an MPI 2000 prober and a Keithley parameter analyzer for remote control. Diagnostic assessments revealed a hardware issue with the prober's GPIB module. We resolved this by connecting an external GPIB module and adjusting software settings, enabling successful communication and automating the wafer test procedure.

- Percolation Models in Disease Dynamics (Related course: Complex Systems) [Repository] Spring 2023
Under supervision of Prof. Shahin Rouhani, we analyzed disease spread using percolation models, comparing outcomes with traditional SIR simulations on weighted graphs. Our project offers key insights into real-world epidemics, emphasizing the significance of percolation models for a nuanced understanding of disease propagation.
- Virial Theorem in Three-Body Gravitational Systems (Related course: Analytical Mechanics II) Spring 2023
Our project explores the three-body gravitational problem. Despite limited analytical knowledge, we simulated the system in various scenarios and confirmed the enduring validity of the Virial theorem over time. This sheds light on the stability of three-body gravitational systems and the resilience of fundamental celestial principles.
- Cloudflare Worker [Repository] Fall 2022
I deployed a Cloudflare worker to facilitate internet access in Iran. To overcome restrictions on GitHub's repository raw content, gist.githubusercontent.com (usually blocked in Iran), the worker is put behind a personal domain to download and forward subscription list content from a Gist. Additionally, the worker addresses DNS-level blocking by pre-resolving domains pointing to proxy servers using DoH.
- Java Yu-Gi-Oh! (Related course: Advanced Programming) [Repository] Spring 2021
We made a graphical Java version of the iconic card game, showcasing programming prowess and game design.

COMPUTER SKILLS

- **Tools and Frameworks:** Numpy, Scipy, Qiskit, IBM Quantum Lab, Git, Linux, L^AT_EX
- **Programming Languages:** Python, R, MATLAB, C/C++, Java, Verilog

LANGUAGES

- **Persian:** Native
- **English:** Fluent
C2 level of proficiency [Iran Language Institute certificate]

EXTRACURRICULAR ACTIVITIES

- Programming hobby
I enjoy crafting scripts and code to simplify and enhance daily tasks. My GitHub account serves as a showcase for the diverse range of projects I undertake.
- Photography
I love capturing moments with both my DSLR camera and mobile phone.
- Cinema Helli film-making group 2017
I co-founded a filmmaking group. We won the best student performance award in the school's seminar.
- LAF student journal editor-in-chief 2016
I gathered a group of ten to write and publish a student journal roughly every month.
- Student Blog 2015
I started a student weblog (1-3helli1.blog.ir) and gathered a team of five. The blog ranked among the top 10 blogs of the year in the country. [Ranking]
